

Lamoni Schools Kindergarten

Welcome to Kindergarten! Before the start of the school year, your child will need the following forms turned in to the Health Office:

_____ **Current Physical**

_____ **Record of current immunizations**

- Please contact Decatur County Public Health or your physician's office to obtain a copy of current immunizations.
- 4 y/o immunizations for Kdg are usually Dtap, IPV, MMR, & varicella

_____ **Lead Test- results needed**

- Most infants are screened after 12 months of age and if the lead level is within normal limits no additional screening is necessary.

_____ **Dental Exam**

- Kindergarten screening may be performed by a DDS, RDH, MD/DO, PA, or RN/ARNP
- IDPH Certificate for Dental Screening is the only acceptable form for this requirement.
- Screening for kindergarten is valid from age 3 years and must be submitted before 4 months of enrollment date.

_____ **Vision Screening**

- Vision screening may be performed by a registered nurse, health care provider, optometrist, or ophthalmologist.
- Vision screening for kindergarten may be performed up to 12 months prior to enrollment date or within 6 months of student's enrollment date.

Thank you for taking the time to gather this necessary information.

To simplify all of the requirements: ***dental, lead, vision, and record of current immunizations*** can be obtained from your primary care physician at the time of your Kindergarten physical. Please take all necessary forms with you to the appointment.
